---

**Precautionary Statements**

---

**Hazards to Humans and Domestic Animals**

**CAUTION**

**Causes Moderate Eye Irritation**

**Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco or using the toilet.**

## **Personal Protective Equipment (PPE)**

- Long-sleeved shirt and long pants
- Shoes and socks
- Chemical-resistant waterproof gloves

### **First Aid**

**If in eyes:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-992-5994 for emergency medical treatment information.

For non-emergency information concerning this product, call the National Pesticides Information Center (NPIC) at 1-800-858-7378 seven days a week, 6:30 am to 4:30 pm Pacific Time (NPIC Website: [www.npic.orst.edu](http://www.npic.orst.edu)).

## **ENVIRONMENTAL HAZARDS**

This product is toxic to aquatic invertebrates. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or when disposing of equipment washwaters. This product is highly toxic to bees and other pollinating insects exposed to direct treatment.

## **DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**READ THIS LABEL:** Read the entire label. This product must be used strictly in accordance with this label's precautionary statements and use directions, as well as with all applicable State and Federal laws and regulations.

### **USE RESTRICTIONS:**

Bait stations are for outdoor use only.

**DO NOT** use in enclosed areas.

### **APPLICATION DIRECTIONS:**

#### **Bait station assembly and use step by step procedure.**

Use gloves when handling bait stations and lures.

It is recommended that bait stations be assembled prior to taking them into the field.

1. Open the large box that contains the bait station components, and check that there are equal numbers of flat 'hats,' bait station boxes, and strings (approximately 250 each).

2. From the separate box of lures, take one 2-component cone (2-C) lure packet. Open packet and insert 2-C lure into cotton T-bag.
3. Tie bait station string onto T-bag lure holder making sure red cap of lure is pointing up.
4. Twist bait station hat into conical shape and staple outer edge with 3 staples, with top/point of hat pointing up.
5. Run bait station string, now attached to the lure, through hole in center of bait station hat and pull lure up so that it is inside the bait station.

### Bait Station Placement and Rate

1. Place 30-40 assembled bait stations in a heavy duty garbage bag for movement to the field.

2. Tie individual bait stations 2-3 meters (around eye level) above the ground and about 1/3 of the way into the tree canopy; this helps minimize accessibility by small children to the bait station.
3. In dooryards with fewer than eight trees, place one bait station per every three trees if trees are close together; one per every two trees if trees are farther apart. For properties with eight or more trees, place one bait station per every four trees.

**Maximum density of bait stations is 100 per acre.**

## **Bait Station Replacement**

Bait stations only need to be serviced once every two months.

1. At two months, place a second bait station with 2-C lure on opposite side of tree or on a nearby tree and add a new lure to original bait station.
2. Two months later, remove 1<sup>st</sup> bait station and replace with new bait station/lure, and add a 2<sup>nd</sup> lure to 2<sup>nd</sup> bait station.
3. Place old used bait stations in plastic heavy duty garbage bags for disposal. At end of day, tie garbage bag with old bait stations and throw into dumpster or other proper disposal container/site.
4. Continue two month rotation of bait stations and lures as long as necessary during the season, or up to one year.

### **Storage and Disposal**

Do not contaminate water, food or feed by storage or disposal.

**Pesticide Storage:** Store in original container only. In case of leak or spill, contain material with absorbent materials and dispose as waste.

**Pesticide Disposal:** Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility.

**Container Handling:** Nonrefillable container. Do not reuse or refill this container.

Then offer for recycling if available or puncture and dispose of in a sanitary landfill, or by incineration, or by other procedures allowed by state and local authorities.
